

ibis **SCORCHER**

I AM THE SCORCHER, FULL OF ZEAL

One look at the Scorcher and you can see that it is a very different bicycle. The Scorcher is about riding in its purest form. No shifting, no coasting, just pedaling and turning. The Scorcher is made to ride. Ride it in the dirt, on the town and over the hilt.

The Scorcher legacy is a century old, inheriting its form from the popular bikes of that era: Crescent moon bars, fixed gear, leather saddle, sloping top tube, painted a very sleek black.

The Scorcher will teach you. Get an education about control, style and grace. It is ultra smooth and ultra comfortable, it is the Ibis Scorcher

Specifications

Frame	ibis hand-built scorcher, with special Tange tubeset
